Introduction

This codebook describes the Illinois Department of Children and Family Services (DCFS) Integrated Database designed by the Chapin Hall Center for Children.

The codebook is divided into four sections. Sections one and two describe Chapin Hall's database tables and outline their contents. Section three contains the data dictionary. The last section provides two appendices that document the data in their original format. Researchers are encouraged to read Appendix A, "Descriptions of the Original Data," before beginning their analyses since this section contains information on the capabilities and limitations of the data.

Please note that Chapin Hall recently integrated documentation for the MARS Voucher data into this codebook (January 2002). Because the data have not been worked with extensively, our understanding of the data remains fairly rudimentary. Users will find that variables from the voucher pull are defined but often lack value lists. Since many of the key variables are dates and amounts, however, it is still possible to work with these data without complete documentation.

About the DCFS Data

The Illinois Department of Children and Family Services (DCFS), the state child welfare agency in Illinois, maintains several information systems which track the children and households to which it provides services and the providers with which it contracts.

Chapin Hall receives extracts from three of the Department's databases on an ongoing basis: the Child Abuse and Neglect Tracking System (CANTS) for child abuse and neglect investigations, the Child and Youth Centered Information System (CYCIS) for child welfare services, and the Management and Reporting System (MARS) for payment tracking.

Because the CANTS, CYCIS, and MARS information systems were designed primarily for accounting purposes, the data they produce are not stored in a format that facilitates research. Chapin Hall extracts the pertinent variables from each data shipment it receives and stores them in a relational database. Chapin Hall also uses probabilistic record linkage techniques to match an individual's records across the three systems thereby creating an "integrated" database. See the appendices in this codebook for more information on the original data.

Database Tables

<u>Table Name</u>	<u>Description</u>
cps_addrlink_yyyymm	<p>The <i>CANTS Address Link File</i>, created from the CANTS Address File, contains one record for every extract in which a change of address occurs.</p> <p>First Pull Date: 12/31/1993</p>
cps_alleg_yyyymm	<p>The <i>Allegation Table</i>, created from the caretaker records on the CANTS Case Pulldown File, contains one record for every child-caretaker-investigation-allegation combination. A child can have two caretakers for one investigation and numerous allegations associated with each caretaker. If a child has no allegations for a given investigation, as in the case of an abused/neglected sibling, he or she will not appear in this table.</p>
cps_chctkr_yyyymm	<p>The <i>Child-Caretaker Table</i>, derived from the CANTS Case Pulldown File's Caretaker Records, represents children and their respective caretakers in investigations. In this table, one record represents each child-caretaker-report combination. The relationship of the caretaker to the child is specified. Chapin Hall uses the report date to capture changes in the relationship field.</p>
cps_child_yyyymm	<p>The <i>Child Table</i>, built from the Child Records in the CANTS Case Pulldown File, records the child's demographic Characteristics and CYCIS identifier (reliable since 1992) at the time of his or her most recent investigation. A child can have only one record in this table.</p>
cps_chinv_yyyymm	<p>The <i>Child Investigation Table</i>, created from the child records of the CANTS Case Pulldown File, records every child living in the household at the time of an investigation. The table contains a protective custody date for those children who were taken into protective custody as well as a code for the protective custody actor. Children in this table have one record for every investigation in which they were named.</p>

<u>Table Name</u>	<u>Description</u>
cps_ctkr_yyyymm	The <i>Caretaker Table</i> , derived from the caretaker records of the CANTS Case Pulldown File, reflects caretaker demographic information as of his or her most recent investigation. The Caretaker Table contains one record for every caretaker.
cps_ctkrinv_yyyymm	The <i>Caretaker-Investigation Table</i> , produced from the caretaker records of the CANTS Case Pulldown File, records every caretaker living in the household at the time of an investigation. Caretakers in this table have one record for every investigation in which they have been named. The table contains an indicator of caretaker involvement in the incident of abuse or neglect as well as the his or her indication status for a particular investigation.
cps_geo_summ_yyyymm	<p>The <i>CANTS Child Geographic Summary Table</i>, created from the CANTS Case Pulldown File, contains geographic information associated with each child-investigation.</p> <p>The monthly address file that Chapin Hall receives contains the child’s subject ID and most recent address. Since a child may have more than one investigation over time and conceivably may move between investigations, the question arises -- what address belongs with what report? Chapin Hall created the summary table as a way of matching child-investigations with the most likely address.</p> <p>This table is built from information in, cps_chinv, cps_inv, cps_addrlink, master_geo, master_geolink, and maser_address. It contains one address (record) for each combination of child and investigation.</p>
cps_inv_yyyymm	The <i>Investigation Table</i> , created from the investigation records of the CANTS Case Pulldown File, contains one record per investigation for each household and can be used to follow households over time (Note: household is not a reliable proxy for “family” since households for individual children change over time). Variables in this table reflect the steps taken during the administrative process of conducting an investigation, such as the date the report was made to the hotline (reptdate), the date the investigation was initiated (initdate), and the date indication status was determined (findate).
cps_link_yyyymm	The <i>CANTS Link Table</i> links children and caretakers in

Table Name

Description

CANTS to their Chapin Hall ID, a unique ID that identifies individuals across several Illinois Human Service System databases that Chapin Hall receives. Because identifying information for all individuals in CANTS (i.e., names) is not preserved over time, the link table reflects those individuals in CANTS who have identifying information at the time of the quarterly extract. The CANTS Link Table contains one record for every child and caretaker with a name in the CANTS System.

cyc_adopt_yyyymm

The information in the *CYCIS Adoption Table* comes from the CYCIS CM 46-47 screens that DCFS uses for recording data on finalized adoptions. These are AFCARS data that DCFS is required to report to the Department of Health and Human Services twice annually¹.

This table should contain one record for every child who was adopted while in DCFS custody after fiscal year 1998.

cyc_case_yyyymm

The *Case Table*, constructed from the "main" records of the CYCIS child pull, contains one record for every case in which a child is named. A child case must be opened for a child to receive individualized services, normally placement into substitute care. Cases are sequenced in reverse chronological order by the "opseqcnt" variable, such that the most recent case always has a sequence of "01". Certain variables in this table are overwritten and therefore reflect the most recent entries (prmgol, estdate, achvdate, evalcode, evaldate, samedate). A case closing date of "000000" indicates that the case has not yet closed.

cyc_chgeo_summ_yyyymm

The *CYCIS Child Geographic Summary Table* identifies the original geographic data associated with each child case. It reflects the first head of household address for a given family case. This family case is then related to the child's individual case based on a comparison of the family case opening date and the child case opening date.

This table contains one record for every child case opening regardless of whether or not a head of household address could be identified for the child case. It is built from information in

¹ AFCARS is the Adoption and Foster Care Analysis and Reporting System.

<u>Table Name</u>	<u>Description</u>
	the following tables: cyc_fam_addrlink, master_addr, master_geolink, master_geo, cyc_case , and cyc_famcase. This table may not contain addresses for child-care. These addresses can be found in cyc_cli_addrlink.
cyc_child_yyyymm	The <i>Child Table</i> , derived from the CYCIS Child Pull's "main" records, contains the child's demographic information recorded at his or her most recent case. The table also contains the child's Department of Human Services ID and Social Security Number. Each child has one record in the Child Table
cyc_cli_addrlink_yyyymm	The <i>Client Address Link File</i> derives from the CYCIS Client Registration Pull. It contains one record for every extract in which there is an observed change of address for an individual in a family cluster. First Pull Date: 9/30/1993
cyc_cli_reg_yyyymm	The <i>Client Registration Table</i> , created from the CYCIS Client Registration Pull, records the family cluster ID, the individual ID, name, address, sex, birth date, and marital status of every person who enters the CYCIS system. If an adult is a head of household, he or she will match to the caseid in the Head of Household Table. The Client Registration Table contains one record for every family cluster to which an individual belongs. Note: In the past, caseno's were not always entered for adult case members.
cyc_cmgr_yyyymm	The <i>Case Manager Table</i> , built from the CYCIS Case Manager Pull, provides characteristics of the case manager and his or her employment. It is most useful for the role it plays in identifying the agency that serves a child. Since the table contains the most recent team with which a case manager has worked (region+site+field codes), it can be related to the Team Table which contains the supervising agency. The Case Manager Team Table also contains the case manager race, education, language spoken, position and position start date.
cyc_cmgr_summ_yyyymm	The <i>Case Manager Summary Table</i> provides the most current team and agency information for each Case Manager.

<u>Table Name</u>	<u>Description</u>
	Addresses in this table reflect the field office of the Case Manager rather than the billing address as in the Provider Address table. This table is derived from the CYCIS Case Manager and Case Manager Team tables as well as two files that convert old team numbers to new team numbers (note: these files are not included in the database).
cyc_cmgr_team_yyyymm	The <i>CYCIS Case Manager Team Table</i> provides the supervisor-provider ID for each case manager team. The supervisor-provider ID describes the agency responsible for the team. This ID can be joined with the prvid in the cyc_provadd table in order to identify the agency name (“pname” variable).
cyc_csjm_yyyymm	<p>The <i>CYCIS Case Journal Table</i>, built from the CYCIS Case Journal Pull, presents the history of case managers associated with a particular child. The assign and reassign dates describe the period in which a given case manager was responsible for a child.</p> <p>Each record in this table represents one case manager-child pairing for a given period of time.</p> <p>Note that the Case Manager ID is coded as “999999” on records representing time periods when the child was not in the system (i.e., between case openings when there are multiple).</p>
cyc_fam_addrlink_yyyymm	<p>The <i>CYCIS Family Address Link File</i> derives from the CYCIS Family Pull. It contains one record for every extract in which there is an observed change of address for a head of household.</p> <p>Family addresses are considered the most accurate of the Cyclic addresses that Chapin Hall receives.</p> <p>First Pull Date: 12/31/91 (One missing pull in each of the following years 1993-1995.)</p>

<u>Table Name</u>	<u>Description</u>
cyc_famcase_yyyymm	The <i>Family Case Table</i> , created from the "main" records of the CYCIS Family Pull, contains one record for every family case opening a family or household experiences. Family case services are provided directly to the family and not to individual children. A family does not need to have a child in substitute care in order for a family case to be opened. Family Case Openings and their respective closings are sequenced by the "opseqcnt" variable in reverse chronological order, such that the current case always has a sequence of "01". A closing date of "000000" indicates that the case is currently open.
cyc_famgeo_summ_yyyymm	The family geographic summary table identifies the original geographic information associated with each family case. The geographic information comes from the address of the head of household in the family. This table reflects the first head of household address in a given family case. There is one record in this file for every family case opening even if a head of household address could not be identified for the family case. This table is derived from information in the following tables: cyc_fam_addrlink, master_addr, master_geolink, master_geo, and cyc_famcase.
cyc_fam_hh_yyyymm	The <i>Family-Head of Household Table</i> , constructed from the "main" records of the CYCIS Family Pull, contains one record for every head of household in the system. The table provides demographic and address information on the head of household. The head of household's relationship to other family or case members cannot be determined from this table. The table also contains the head of household's Social Security Number and CANTS caretaker identifier (reliable since 1990). Each head of household may appear in multiple family cases, although each case has only one head of household.
cyc_fcsjrn_yyyymm	The <i>Family Case Journal Table</i> , built from the CYCIS Case Journal Pull, presents the history of case managers associated with a particular family. The assign and reassign dates describe the period in which a given case manager was responsible for the family. Each record in this table represents one case manager-child pairing for a given period of time. Note that the Case Manager ID is coded as "999999" on

<u>Table Name</u>	<u>Description</u>
	records representing time periods when the family was not in the system (i.e., between family case openings when there are multiple).
cyc_goal_estab_yyyymm	<p>The <i>Goal Establish Table</i> is created from the CYCIS Permanency Goal Pull. It records the history of permanency goals assigned to children with open child cases. The table contains the date on which the goal was established as well as the date on which it was achieved.</p> <p>The <i>Goal Establish Table</i> contains one record for every goal established during the child's case.</p>
cyc_goal_eval_yyyymm	<p>The <i>Goal Evaluation Table</i> is built from the CYCIS Goal Evaluation Pull. Each record in this table represents an evaluation of a permanency goal. The table provides the date of evaluation as well as a code indicating the status of the permanency goal.</p>
cyc_legal_yyyymm	<p>The <i>Legal Table</i> is created from the Legal Trailer records of the CYCIS Child Pull. It provides an historical view of the child's changes in legal status. Legal changes can be associated with a child case by comparing the legal date to the case opening and closing dates.</p> <p>The Legal Table contains one record for every legal status change a child experiences.</p>
cyc_link_yyyymm	<p>The <i>CYCIS Link Table</i> links children and adults registered in the CYCIS database to their Chapin Hall ID, a unique ID that identifies children and adults across the Illinois Human Service System databases that Chapin Hall receives. Chapin Hall continually updates the CYCIS link table with new individuals from each quarterly extract. The table is therefore considered “historical.”</p> <p>The CYCIS Link Table contains one record for every child and adult in the CYCIS System.</p>
cyc_livar_yyyymm	<p>The <i>Living Arrangement Table</i>, derived from the Living Arrangement Trailer of the CYCIS Child Pull, tracks individual children through every change in living arrangement within and across cases. Neither the pull nor the</p>

<u>Table Name</u>	<u>Description</u>
	<p>table contains an ending date for living arrangements. It is assumed that the beginning of one living arrangement marks the end of the previous. Living arrangements are sequenced in reverse chronological order by the opseqcnt variable. This table contains one record for every child-living arrangement.</p>
cyc_provadd_yyyymm	<p>The <i>Provider Address Table</i> is created from the Provider Licensing Pull, an extract of the Provider Registration and Tracking and Licensing Systems. Information in this file is overwritten each time there is a change in the provider's license. As a result, the address and Social Security information recorded here is the most recent.</p> <p>The Provider Address Table contains one record for each service provider.</p>
cyc_provlic_yyyymm	<p>The <i>Provider Licensing Table</i> is created from the Provider Licensing Pull, an extract of the Provider Registration and Tracking and Licensing Systems. The Provider Licensing Table contains one record for every change in licensing status a provider experiences. Changes within provider are tracked through the seqcnt variable.</p>
cyc_prv_addrlink_yyyymm	<p>The <i>CYCIS Provider Licensing Address Link File</i> derives from the CYCIS Provider Licensing Registration Pull. It contains one record for every extract in which there is an observed change of address for a licensed provider.</p> <p>The Provider Licensing Address link file contains one record for each service provider.</p> <p>First Pull Date: 9/30/1993</p>

<u>Table Name</u>	<u>Description</u>
mars_board_yyyy_yyyy	<p>The <i>Board Table</i> is built from the MARS Board Pull that DCFS assembles once each year. It contains records of payments made to service providers for the room and board of children in out of home care. Data in the Board Table begin with state fiscal year 1995 and are longitudinal. They contain various descriptors of board payments including the typeserv code and living arrangement date. Payments are categorized as being either “payment” or “receivable” records.</p> <p>The data should contain at least one payment record for every child who was placed in out of home care.</p>
mars_vouch_detail_yyyy_yyyy	<p>The <i>Voucher Detail Table</i> is created from the B or “detail” records of the MARS Voucher Fiscal Year Pull. B records contain information on the children and families who received services for which a vendor was paid. They identify the provider and the client, dates of service, and itemized payments for services. The records provide detail on the summary records found in the <i>MARS Voucher Summary Table</i>, though not all summary records have related detail records.</p> <p>Each record in the <i>Detail Table</i> represents one payment.</p> <p>Chapin Hall has documented the following characteristics of B records:</p> <ul style="list-style-type: none"> • The client ID, <i>vcliid</i>, is missing on 16-30% of the voucher B records. When <i>vcliid</i> contains a value, we assume that the B record is providing information about the service a particular client received. • Most <i>typeserv</i> codes found on the B records differ from those normally seen in the <i>cyc_livar</i> table • <i>tot_pd_a</i> reflects the total paid amount for each voucher B record. The more detailed amount variables should sum to the value of <i>tot_pd_a</i>.

<u>Table Name</u>	<u>Description</u>
mars_vouch_summ_yyyy_yyyy	<p>The <i>Voucher Summary Table</i> is created from the A or “Summary” records of the MARS Voucher Fiscal Year Pull. It contains data on payments made to service vendors for children and families served by DCFS. A records identify the provider and total payment amount and provide information on taxation.</p> <p>Chapin Hall has documented the following characteristics of A records:</p> <ul style="list-style-type: none"> • In most cases, the obligation amount (<i>oblamt</i>) is the same as the first object code amount (<i>obj2amt</i>). • The variable <i>voucid</i> is usually the unique key for these records. In the few instances where the <i>voucid</i> is not unique (within a fiscal year) the records contain different voucher status dates (<i>vsdate</i>). Since we assume that these records reflect the same payment, we feel it is justifiable to select only one record per <i>voucid</i> for analysis. • It is most likely that the <i>obj2amt-obj2amt5</i> variables reflect the total dollar amount of the voucher, although Chapin Hall is uncertain of how these compare to the expense variable (<i>expend</i>). • In 98% of the A records the <i>obj2amt</i> equals the sum of the <i>tot_pd_a</i> across all voucher B records when A and B records are joined by <i>voucid</i> and <i>vsdate</i>.
master_geo_yyyymm	<p>The <i>Master Address Geographic File</i> is created from select pieces of information from the Census Tiger Files. Chapin Hall uses variables in this file to construct LANs for LAN-based analyses. Each record in this file represents a unique set of geographic indicators.</p>
master_geolnk_yyyymm	<p>The <i>Master Address Geo Link File</i> links addresses in the Master Address File to Geographic Codes in the Master Address Geographic File. Each record in this file represents one address-geocode pair.</p>
master_event_yyyymm	<p>The <i>Master Event Table</i> contains one record for every case or placement event a child experiences. Chapin Hall creates this table from the CYCIS Living Arrangement, Case, Child, Provider Address, and Provider Licensing tables.</p>

Table Name

Description

In this table, a placement is defined as the time a child is with a particular provider in one type of care. Each record contains an event type, the event starting and ending dates, and a code for the next event the child experiences.

Case and placement events are defined by the value of the Type of Service (typeserv) variable. If the Type of Service variable has no value as in the case of unpaid placements, the 'typecode' variable is used to define the event.

The combination of provider SSN and prvid will uniquely identify a provider. When a provider has multiple Provider ID's over time Chapin Hall unduplicates by SSN. However, not all providers have SSN's.

master_spell_yyyymm

Each record in the *Master Spell Table* captures the time a child spends in out-of-home placement during an open child case. Out-of-home placement spells end with a case closing case closing, or placements in the home of parent, home of adoptive parent, or subsidized guardianship.

Chapin Hall creates this table from the Master Event table.

monitor_yyyymm

The *Monitor Table* is a placement spell table containing records of placements in cases ever-opened since July 1, 1989. Chapin Hall creates this table from the CYCIS Living Arrangement, Case, Child, Provider Address, and Provider Licensing tables.

In this table a placement is defined as the time in which a child remains with a particular provider. The first type of care a child experiences with a given provider defines the placement type assigned to the spell. Thus, although a child's placement type may change or be reclassified while with a particular provider, in this table the child will retain his/her first placement type as long as he/she remains with that provider.

Case and placement events are defined by the value of the Type of Service variable. If the Type of Service variable has no value as in the case of unpaid placements, the Type Code variable is used to define the event.

The combination of provider SSN and prvid will uniquely

Table Name

Description

identify a provider. When a provider has multiple Provider ID's over time Chapin Hall unduplicated by SSN. However, not all providers have SSN's.

The table contains one record for every placement spell a child has with a provider.

subcare_spell_yyyymm

Each record in the *Substitute Care Spell Table* captures the time a child spends in substitute placement during an open child case. Substitute care placement spells are defined to include time spent in relative, traditional, and specialized foster care, group homes, and institutions. Substitute care excludes independent living, runaway, subsidized guardianship, adoptive homes, parental homes, and "other" (OTH) living arrangements.

Chapin Hall creates this table from the Master Event table.

Contents of Database Tables

cps_addrlink_yyyymm

chnghdate	Extract Date Where Address First Observed
subjid	CANTS Subject ID
addid	Address ID

Field Length: 8

Corresponding Table(s): monitor_yyyymm

brdid

Description: Numeric ID that uniquely identifies a board payment

Data Type: Integer

Field Length: 4

Corresponding Table(s): mars_board_yyyy_yyyy

cants_id

Description: CANTS ID in CYCIS. Uniquely identifies an individual in the CANTS system.

Data Type: Floating Point Integer

Field Length: 8

Corresponding Table(s): cyc_child_yyyyymm, cyc_fam_hh_yyyyymm

Comments: Efforts to complete the entry of this field were made beginning in 1990. The field will not be reliable for unfounded cases or for children who enter care after in-home services are provided. Pilistic linkage is still the most reliable way to identify the CANTS records of children in CYCIS (please see CH_ID).

caseid

Description: CYCIS Household ID

Data Type: Character

Field Length: 6

Corresponding Table(s): cyc_adopt_yyyyymm, cyc_case_yyyyymm, cyc_chgeo_summ_yyyyymm, cyc_child_yyyyymm, cyc_cli_addrlink_yyyyymm, cyc_cli_reg_yyyyymm, cyc_csjm_yyyyymm, cyc_famcase_yyyyymm, cyc_fcjm_yyyyymm, cyc_famgeo_summ_yyyyymm, cyc_goal_estab_yyyyymm, cyc_goal_eval_yyyyymm, cyc_legal_yyyyymm, cyc_link_yyyyymm, cyc_livar_yyyyymm, monitor_yyyyymm, mars_board_yyyy_yyyy, mars_vouch_detail_yyyy_yyyy, master_event_yyyyymm, master_spell_yyyyymm, subcare_spell_yyyyymm

Comments: In the CYCIS Child Case and Family Case tables caseid relates to the first 6 digits of the family cluster id (clusid) in the Client Registration table (the last 2 digits of clusid are always "00")

casename

Description: Case Full Name

Data Type: Character

Field Length: 40

Corresponding Table(s): cps_inv_yyyyymm

caseno

Description: Case Number. CYCIS individual identifier when used in conjunction with the caseid.

Data Type: Character

Field Length: 2

Corresponding Table(s): cyc_adopt_yyyyymm, cyc_case_yyyyymm, cyc_chgeo_summ_yyyyymm, cyc_child_yyyyymm, cyc_cli_addrlink_yyyyymm, cyc_cli_reg_yyyyymm, cyc_csjrn_yyyyymm, cyc_goal_estab_yyyyymm, cyc_goal_eval_yyyyymm, cyc_legal_yyyyymm, cyc_link_yyyyymm, cyc_livar_yyyyymm, monitor_yyyyymm, mars_board_yyyy_yyyy, mars_vouch_detail_yyyy_yyyy, master_event_yyyyymm, master_spell_yyyyymm, subcare_spell_yyyyymm

catgid

Description: Budget category identification

Data Type: Character

Field Length: 4

Corresponding Table(s): mars_vouch_summ_yyyy_yyyy

censor

Description: Censor Code. Flag indicating whether or not a spell has been right censored.

Data Type: Small Integer

Field Length: 2

Corresponding Table(s): master_spell_yyyyymm, subcare_spell_yyyyymm

Values:

1	Reunification
2	Adoption
3	Still in Care
4	Otherwise Exited
5	Subsidized Guardianship
6	Independent Living
7	Other/Runaway/Missing

chicago

Description: Chicago Resident Flag
Data Type: Character
Field Length: 1
Corresponding Table(s): cps_geo_summ_yyyyymm, cyc_chgeo_summ_yyyyymm, cyc_famgeo_sum_yyyyymm, master_addr_yyyyymm
Comments: Have not verified reliability of code. The most reliable method for selecting Chicago cases is to select placecode=14000 from the master geo table.

Values:

0	Not Chicago
1	Chicago

CH_ID

Description: Chapin Hall ID. Uniquely identifies an individual across CANTS and CYCIS.
Data Type: Character
Field Length: 8
Corresponding Table(s): cps_link_yyyyymm, cyc_link_yyyyymm

childsid

Description: Unique ID assigned to children in the CANTS system
Data Type: Character
Field Length: 8
Corresponding Table(s): cps_alleg_yyyyymm, cps_chatkr_yyyyymm, cps_child_yyyyymm, cps_chinv_yyyyymm, cps_geo_summ_yyyyymm, monitor_yyyyymm
Comments: In some cases the childsid in the CANTS Child table will relate to the ctkrsid in the CANTS Caretaker table if the child later becomes the subject of an abuse/neglect investigation as a caretaker.

chnngdate

Description: Date of extract where address first observed
Data Type: Datetime
Field Length: 8
Corresponding Table(s): cps_addrlink_yyyymm, cyc_cli_addrlink_yyyymm, cyc_fam_addrlink_yyyymm, cyc_prv_addrlink_yyyymm
Comments: In the CYCIS Case Manager table, this date represents the date the segment was last changed (last data entry).

chnng_dt

Description: Data Change Date
Data Type: Datetime
Field Length: 8
Corresponding Table(s): cyc_adopt_yyyymm

city

Description: Residence City
Data Type: Character
Field Length: 20
Corresponding Table(s): cyc_adopt_yyyymm, cyc_cli_reg_yyyymm, cyc_cmgr_summ_yyyymm, cyc_fam_hh_yyyymm, cyc_provadd_yyyymm,
Comments: In the adoption table, city is the adoptive family city.

city [cmgr_team]

Description: Field Office City
Data Type: Character
Field Length: 12
Corresponding Table(s): cyc_cmgr_team_yyyymm

city [mast_addr]

Description: Residence City
Data Type: Character
Field Length: 15
Corresponding Table(s): master_addr_yyyymm

cliid

Description: CYCIS Household ID
Data Type: Character
Field Length: 6
Corresponding Table(s): cyc_fam_addrlink_yyyymm, cyc_famcase_yyyymm, cyc_fam_hh_yyyymm
Comments: In the CYCIS Head of Household table, relates to caseid in the CYCIS Client Registration, Child, and Link tables

clino

Description: Individual component of the CYCIS Household ID (cliid)
Data Type: Character
Field Length: 2
Corresponding Table(s): cyc_fam_addrlink_yyyymm, cyc_famcase_yyyymm, cyc_fam_hh_yyyymm
Comments: In the CYCIS Head of Household table, relates to caseno in the CYCIS Client Registration, Child, and Link tables

clm_type

Description: Type of board claim.
Data Type: Character
Field Length: 1
Corresponding Table(s): mars_board_yyyy_yyyy

Values:

C	Definition unknown at this time (2003.02.12)
N	Definition unknown at this time (2003.02.12)

clname

Description: Case Last Name
Data Type: Character
Field Length: 15
Corresponding Table(s): cyc_famcase_yyyymm

closdate

Description: Child Welfare Case Closing Date
Data Type: Datetime
Field Length: 8
Corresponding Table(s): cyc_case_yyyyymm, cyc_famcase_yyyyymm, monitor_yyyyymm

closrsn

Description: Child Welfare Case Closing Reason
Data Type: Character
Field Length: 2
Corresponding Table(s): cyc_case_yyyyymm, cyc_famcase_yyyyymm, master_event_yyyyymm

Values:

CA	Completed Adoption
CD	Child Deceased
CR	Court Order Release
CT	Court Jurisdiction Not Taken
GS	Guardian Successor
MA	Moved Out of Area
MI	Missing
NA	Non-Active Family
OA	Other Agency Services
OT	Other Reason
RA	Relative Adoption
RM	Reached Majority
SC	Service Completed
SG	Subsidized Guardian
UK	Unknown
UL	Unable to Locate
VW	Voluntary Withdrawal

clusid

Description:	CYCIS Family Cluster ID. Identifies a family unit at a particular point in time.
Data Type:	Character
Field Length:	8
Corresponding Table(s):	cyc_child_yyyyymm, cyc_cli_reg_yyyyymm, monitor_yyyyymm
Comments:	In the CYCIS Child table, clusid is most often the child's current clusid. The current clusid may refer to a family cluster which was formed many years after the individual was a child in the system. The ID may refer to a family cluster in which the individual is now the head of household. The last 2 digits of the clusid are always "00".

cmgrid

Description:	Case Manager ID. Uniquely identifies the Case Manager.
Data Type:	Character
Field Length:	6
Corresponding Table(s):	cps_inv_yyyyymm, cyc_case_yyyyymm, cyc_cmgr_yyyyymm, cyc_cmgr_summ_yyyyymm, cyc_csjrn_yyyyymm, cyc_famcase_yyyyymm, cyc_fcsjrn_yyyyymm, mars_board_yyyy_yyyy

cmspvsid

Description:	CYCIS Case Manager Supervisor's ID
Data Type:	Character
Field Length:	6
Corresponding Table(s):	cyc_case_yyyyymm, cyc_cmgr_yyyyymm, cyc_famcase_yyyyymm

cntrid

Description:	Partial contract ID. The partial contract id is taken from the 10 digit contract id that is used to identify contracts in MARS. The first two digits of the partial contract id are the fiscal year of the contract. The last three digits represent a unique contract number. The full 10 digit contract consists of the six digit provider id, the three digit unique contract number, and the last digit of the fiscal year.
Data Type:	Character
Field Length:	5
Corresponding Table(s):	cyc_livar_yyyymm
Comments:	Can be used with the provider ID to identify shelter placements

cnty

Description:	County
Data Type:	Character
Field Length:	3
Corresponding Table(s):	cps_child_yyyymm, cps_ctkr_yyyymm, cps_geo_summ_yyyymm, cps_inv_yyyymm, cyc_chgeo_summ_yyyymm, cyc_child_yyyymm, cyc_cli_reg_yyyymm, cyc_fam_hh_yyyymm, cyc_famgeo_summ_yyyymm, cyc_legal_yyyymm, cyc_provadd_yyyymm
Comments:	<p>In the CANTS child and caretaker tables cnty is the county of residence; in the CANTS investigation table the county responsible for investigating; in the CYCIS child table, the client or provider county; in the CYCIS legal table, the child's legal county; and in the CYCIS provider table, the county of residence or agecny county.</p> <p>Before the rewrite of the CANTS system in the early 1990s, the county field was also used to denote the team office. In the case where there was more than one team in an area, they added 100 to the county code to indicate the "super-office". Any county code greater than 106 should be considered a super-office. These offices are marked below with an asterisk.</p>

ctkrsid

Description: Unique, individual ID assigned to Caretakers in the CANTS system. CANTS identifies up to 6 caretakers in an investigation.

Data Type: Character

Field Length: 8

Corresponding Table(s): cps_alleg_yyyymm, cps_chctkr_yyyymm, cps_ctkrinv_yyyymm, cps_ctkr_yyyymm

Comments: In some cases the ctkrsid in the CANTS Ctkr table will relate to the childsid in the CANTS Child table if the caretaker was once part of an abuse/neglect investigation as a child.

ctznstat

Description: Citizenship Status

Data Type: Character

Field Length: 1

Corresponding Table(s): cyc_child_yyyymm, cyc_fam_hh_yyyymm

Values:

1	Birth
2	Naturalization
3	Lawfully Admitted Alien
4	Unlawfully Admitted Alien
M	Missing

ctznver

Description: Citizenship Verification

Data Type: Character

Field Length: 1

Corresponding Table(s): cyc_child_yyyymm, cyc_fam_hh_yyyymm

Values:

1	Birth Certificate
2	Citizenship Paper
3	Alien Registration Card
4	DPA 2029
5	CFS 402
6	I94
7	Verified Illegal Alien
8	Unable to Verify
M	Missing

cycis_id

Description: CYCIS ID in CANTS. Uniquely identifies a child or head of household in CYCIS.

Data Type: Character

Field Length: 8

Corresponding Table(s): cps_child_yyyymm, cps_ctkr_yyyymm

Comments: Efforts to complete the entry of this field were made beginning in 1990. The field will not be reliable for unfounded cases or for children who enter care after in-home services are provided. The probabilistic linkage is still the most reliable way to identify the CANTS records of children in CYCIS (please see CH_ID).

day_age_from_ind

Description: Indicates whether lower age limit for daytime care is in years, months, or weeks

Data Type: Variable Character

Field Length: 1

Corresponding Table(s): cyc_provlic_yyyymm

Values:

M	Months
W	Weeks
Y	Years

day_age_from_range

Description: Lower age limit for daytime care

Data Type: Variable Character

Field Length: 6

Corresponding Table(s): cyc_provlic_yyyymm

day_age_to_ind

Description: Indicates whether upper age limit for daytime care is in years, months, or weeks

Data Type: Variable Character

Field Length: 1

Corresponding Table(s): cyc_provlic_yyyymm

Values:

M	Months
W	Weeks
Y	Years

day_age_from_rnge

Description: Lower age limit for daytime care

Data Type: Variable Character

Field Length: 6

Corresponding Table(s): cyc_provlic_yyyymm

day_open_from_hour

Description: Hour daytime care begins

Data Type: Variable Character

Field Length: 6

Corresponding Table(s): cyc_provlic_yyyymm

day_open_to_hour

Description: Hour daytime care ends

Data Type: Variable Character

Field Length: 6

Corresponding Table(s): cyc_provlic_yyyymm

day_capacity

Description: Daytime Total Capacity (includes extended hours children)

Data Type: Variable Character

Field Length: 6

Corresponding Table(s): cyc_provlic_yyyymm

dock_id

Description: Legal Docket ID
Data Type: Character
Field Length: 15
Corresponding Table(s): cyc_legal_yyyymm

dpa_id

Description: Department of Public Aid Recipient ID

Data Type: Character

Field Length: 9

Corresponding Table(s): cyc_child_yyyyymm

dra

Description: Placement ever “Delegated Relative Authority” indicator

Data Type: Character

Field Length: 1

Corresponding Table(s): monitor_yyyyymm

Values:

0	Never DRA
1	Ever DRA

dtl_pday

Description: Number of days of room and board (for foster children) that are paid for during the month. Note: this does not necessarily represent continuous days in care during the month.

Data Type: Character

Field Length: 2

Corresponding Table(s): mars_board_yyyy_yyyy

Values: *Values range from 0-31*

dtl_smo

Description: Month in which the service (room and board) occurred

Data Type: Character

Field Length: 2

Corresponding Table(s): mars_board_yyyy_yyyy

dtl_syr

Description: Year in which the service (room and board) occurred

Data Type: Character

Field Length: 2

Corresponding Table(s): mars_board_yyyy_yyyy

edate

Description: Ending Date

Data Type: Datetime

Field Length: 8

Corresponding Table(s): monitor_yyyymm, master_event_yyyymm, master_spell_yyyymm, subcare_spell_yyyymm

enddate

Description: Provider License Ending Date

Data Type: Datetime

Field Length: 8

Corresponding Table(s): cyc_provlic_yyyyymm

endevent

Description: Next Event Type

Data Type: Character

Field Length: 3

Corresponding Table(s): monitor_yyyyymm, master_event_yyyyymm

Values:

0	Case Opening
???	Invalid
ABD	Abducted. Child's whereabouts are unknown and the child is believed to be removed from the jurisdiction of the court.
ASD	Armed Services Duty
CIL	Community Integrated Living Arrangement. For developmentally disabled youth 18 years of age or older, who have been placed in a CIL approved by the Department and IDHS.
CUS	College/University Scholarship. DCFS Scholarship only.
DEC	Deceased. Reports the death of a child when the Department has an open case and legal responsibility for the child.
DET	Detention Facility/Jail
DRA	Delegated Relative Authority. Not in use after 1/1/1997.
FHA	Foster Home Adoption
FHB	Foster Home Boarding - DCFS
FHI	Foster Home Indian. Licensed, Specified or approved by an Indian child's tribe.
FHP	Foster Home Boarding - Private Agency
FHS	Foster Home Specialized
GDN	Guardian Successor. This program is only offered if they are in a cost-neutrality area described in Rules 302, Section 302.405.
GRH	Group Home

HAP	Home Adoptive Parents. This code is used to report the final living arrangement after adoption is completed.
HHF	Hospital/Health Facility
HMP	Home of Parent. Used also for Adoption Assistance cases.
HMR	Home of Relative
HRA	Home of Relative Application
ICF	Institution - DCFS
IDC	Institution – Committed to the Department of Corrections
ILO	Independent Living Only
IMH	Institution – Department of Mental Health
IOP	Institution - Other Public
IPA	Institution - Private Child Care Facility
IRS	Institution Rehabilitation Services
JTP	Job Training Program. Child is participating in a recognized job-training program.
MIS	Other Missing Living Arrangement
NCF	Nursing Care Facility
OTH	Other
PND	Pending Living Arrangement
RNY	Runaway
SGH	Subsidized Guardian Home
TLP	Transitional Living Program. Placement approved by a regional Clinical Services Manager.
UAP	Unauthorized Placement. The child's whereabouts are known, but the child is living in an unauthorized/unapproved placement.
UNK	Other Unknown
WCC	Whereabouts Unknown. Child periodically initiates contact with his or her assigned caseworker.
WUK	Whereabouts Unknown. The child's whereabouts are unknown and the child is not known or believed abducted.
YES	Youth Emergency Shelters
YIC	Youth in College. Placement approved by the Deputy Director of the Division of Educational and Transition Services. This code may only be entered by the Central Office Payment Unit.
YIE	Youth in Employment. Placement approved by the Deputy Director of the Division of Educational and Transition Services. This code may only be entered by the Central Office Payment Unit.
ZZA	Case Closing for Adoption
ZZZ	Case Closing

endtype

Description: Placement Type Categorization

Data Type: Character

Field Length: 2

Corresponding Table(s): monitor_yyyymm

Values:

0	Currently in Placement
1	Reunification
2	Case Closing
3	Relative Home
4	Foster Home
5	Group Home or Institution
6	Shelter
7	Runaway
8	Other Type
9	Adoptive Home
10	All Other Placements
11	Subsidized Guardianship

entry_dt

Description: Data Entry Date

R	Deaf
S	Deaf/Blind
T	Substance Abuse
U	Adult Developmental Disability/Mental Disorder
V	Developmentally Disabled / Child in Need of Mental Health Services
W	Developmental Disability and Substance Abuse
X	Medically Complex/ Developmental Disability (chronically disabled)
Y	Medically Complex/No Developmental Disability
Z	Blood Born Disease

handicap [CYCIS]

Description: Handicap Code

Data Type: Character

Field Length: 2

Corresponding Table(s): cyc_child_yyyymm, cyc_fam_hh_yyyymm

Comments: When a child who was previously being served as part of an intact family is placed in substitute care, the disability code for the child is updated, if necessary, within three working days of the worker's receipt of the result of the comprehensive assessment.

At the first ACR, after the child goes into placement, the ACR reviewer confirms with the worker the accuracy of the disability code for the child and if necessary, advises the worker to change the code in the CYCIS system if the ACR reviewer determines that the Code has not been changed to reflect the results of the comprehensive assessment.

The values in this field are considered reliable.

Values:

1	ADULT MENTAL DISORDR
2	AUTISM
3	BLOOD BORN DISEASES

4	CEREBRAL PALSY
5	CHILD NEEDS MH SERV.
6	DEAF
7	DEAF/BLIND

office

Description: Assigned Field Office. Part of the Region/Team/Office identifier used to distinguish investigative teams in CANTS. The value of the office variable does not have a meaning independent of region and team values. For Cook County regions, Region/Team/Office combinations correspond to Region/Site/Field combinations in CYCIS. For Non-Cook regions this is not true. Instead, Region/Team/Office combinations correspond to Region/Field/Site combinations in CYCIS.

Data Type: Character

28	Cannot be provided for in a home environment due to a developmental disability or mental illness or because he or she is a danger to self or others provided goals 20-25 have been ruled out
99	DCFS has legal responsibility for one or more children in the family
MI	Missing

prvid

Description: Provider ID

Uniquely identifies the CYCIS provider

Data Type: Character

Field Length: 6

Corresponding Table(s): cyc_adopt_yyyymm, cyc_livar_yyyymm, cyc_provadd_yyyymm, cyc_provlic_yyyymm, cyc_prv_addrlink_yyyymm, monitor_yyyymm, mars_board_yyyy_yyyy, mars_vouch_detail_yyyy_yyyy, master_event_yyyymm, mars_vouch_summ_yyyy_yyyy

Comments: A provider is also a supervisor if their prvid is the same as their spvsid.

The prvid in the CYCIS Provider Address table relates to the spvsid in the Licensing and Registration table.

In a number of cases, different prvids were given to the same provider. When selecting from the Provider Address table, the combination of prvsid and prvssn will uniquely identify a provider. Prvssn should not be used alone to identify providers since it is missing in some cases.

prvssn

Description: Provider Social Security Number

Data Type: Character

Field Length: 9

Corresponding Table(s): master_event_yyyymm

Comments: We assume that providers who are institutions have Federal Employer Identification Numbers (FEINs) in this field. When using this ID to unduplicate providers, some providers such as group homes use the supervising agency's FEIN.

prvtype

Description: Provider Type Code

Data Type: Character

Field Length: 3

Corresponding Table(s): cyc_provlic_yyyymm

Values:

statcode [cmgr]

Description: Case Manager Segment Status Code

Data Type: Character

Field Length: 1

Corresponding Table(s): cyc_cmgr_yyyymm

Values:

A	Active
I	Inactive

statcode [lgl]

Description: Child Legal Status Code

Data Type: Character

Field Length: 2

Corresponding Table(s): cyc_legal_yyyymm

Values:

AR	Adoptive Rights
CO	Court Ordered Supervision
CT	Court No Jurisdiction
CU	Custody (no lgl)
GO	Guardianship Only
MI	Missing

NC	No Change
NO	None
PC	Protective Custody
RN	Runaway
SB	Surrender Both Parents
SF	Surrender Father
SM	Surrender Mother
TC	Temporary Custody
TR	Temporary Custody
TW	Temporary Custody
UK	Unknown
VP	Voluntary Placement

statdate

Description: Status Date

Data Type: Datetime

Field Length: 8

Corresponding Table(s): cyc_cmgr_yyyymm, cyc_provlic_yyyymm

Comments: In the Case Manager table statdate is the case manager status date; in the Provider Licensing table it is the provider licensing status date

state

Description: Residence State

Data Type: Character

Field Length: 2

Corresponding Table(s): cyc_adopt_yyyymm, cyc_cli_reg_yyyymm, cyc_cmgr_summ_yyyymm, cyc_cmgr_team_yyyymm, cyc_fam_hh_yyyymm, cyc_provadd_yyyymm, master_addr_yyyymm

Comments: In the Adoption table state is the adoptive family state, and in the Case Manager Team table it is the field office state.

statind

Description: Child Welfare Case Status
Data Type: Character
Field Length: 1
Corresponding Table(s): cyc_case_yyyyymm, cyc_famcase_yyyyymm
Values:

C	Closed
O	Open

street

Description: Residence Street *
Data Type: Character
Field Length: 30
Corresponding Table(s): cyc_cli_reg_yyyyymm, cyc_cmgr_summ_yyyyymm, cyc_cmgr_team_yyyyymm, cyc_fam_hh_yyyyymm, cyc_provadd_yyyyymm, master_addr_yyyyymm
Comments: *In the *CYCIS Case Manager Team Table* street is the field office street. In the *Master Address Table* it is the street Name rather than residence street.

street [adopt]

Description: Adoptive Family Street
Data Type: Character
Field Length: 40
Corresponding Table(s): cyc_adopt_yyyyymm

sub_aprv

Description: Subsidy Approval Date
Data Type: Datetime

Field Length: 8
Corresponding Table(s): cyc_adopt_yyyymm

sub_cmpl

Corresponding Table(s): cyc_adopt_yyyymm

subdate

Description: Voucher submit date
Data Type: Datetime
Field Length: 8
Corresponding Table(s): mars_vouch_summ_yyyy_yyyy

subjid

Description: CANTS Subject ID. Depending on the individual's role in a CANTS abuse or neglect report, this ID will refer to either a child (childsid) or an adult (ctkrsid), or in some cases both. If a caretaker in one report was once a child in another report the database tries to recognize this by assigning the same subjid to the child and the caretaker (i.e. childsid=ctkrsid).

The subjid is used only in the link table.

Data Type: Character
Field Length: 8
Corresponding Table(s): cps_link_yyyymm, cps_addrlink_yyyymm

sub_strt

Description: Subsidy Start Date
Data Type: Datetime
Field Length: 8
Corresponding Table(s): cyc_adopt_yyyymm

suffqual

Description: Street Suffix Qualifier
Data Type: Character
Field Length: 3
Corresponding Table(s): master_addr_yyyymm

sufftype

Description: Street Suffix Type
Data Type: Character
Field Length: 4
Corresponding Table(s): master_addr_yyyymm

team

Description: This variable is a part of the Region/Team/Office identifier used to distinguish investigative teams in CANTS. The value of the office variable does not have a meaning independent of region and team values. For Cook County regions, Region/Team/Office combinations correspond to Region/Site/Field combinations in CYCIS. For Non-Cook regions this is not true. Instead, Region/Team/Office combinations correspond to Region/Field/Site combinations in CYCIS.

Data Type: Character
Field Length: 2
Corresponding Table(s): cps_inv_yyyymm

telid

Description: Phone Number
Data Type: Character
Field Length: 10
Corresponding Table(s): cyc_cmgr_yyyymm

termreas

Description: Placement termination reason
Data Type: Character
Field Length: 3
Corresponding Table(s): cyc_livar_yyyymm

Values:

ASP	Adoption Subsidy Rate Change
DIT	Disrupted Termination
HPU	Payment Unit New Livar Segment Indicator
MAT	Mutually Agreed Upon Termination
MIS	Missing
PAY	Indicator of automated or large scale Conversion that creates new livar segments
POC	Placement Objectives Completed
RNY	Runaway
UNT	Uncontrolled Termination

totalpay

Description: Board and administrative payments over the placement for typeserv codes associated with out of home placement. Excludes some payments such as the Christmas bonus and school supplies.
Data Type: Floating Point Integer
Field Length: 8
Corresponding Table(s): monitor_yyyymm

tot_pd_a

Description: Total paid amount (2 decimal places included)
Data Type: Floating Point Integer
Field Length: 8
Corresponding Table(s): mars_board_yyyy_yyyy, mars_vouch_detail_yyyy_yyyy

tpr

Description: Indicates whether parental rights have been terminated
Data Type: Character
Field Length: 1
Corresponding Table(s): cyc_adopt_yyyymm

Values:

N	No
Y	Yes

tpr_date

Description: Parental Rights Termination Date
Data Type: Datetime
Field Length: 8
Corresponding Table(s): cyc_adopt_yyyymm

tract

Description: Census Tract. A geographic statistical entity within a county or the equivalent of a county. Generally has a population size between 2,500 and 8,000 people with an average of 4,000. Tracts are made up of contiguous census blocks.

Data Type: Character

Field Length: 6

Corresponding Table(s): cps_geo_summ_yyyymm, cyc_chgeo_summ_yyyymm, cyc_famgeo_summ_yyyymm, master_geo_yyyymm

trn_cmpl

Description: Training Completion Date

Data Type: Datetime

Field Length: 8

Corresponding Table(s): cyc_adopt_yyyymm

typecode

Description: Child Living Arrangement Type

Data Type: Character

Field Length: 3

Corresponding Table(s): cyc_livar_yyyymm, mars_board_yyyy_yyyy

Values:

???	Invalid
ABD	Abducted. Child's whereabouts are unknown and the child is believed to be removed from the jurisdiction of the court.
ASD	Armed Services Duty
CIL	Community Integrated Living Arrangement. For developmentally disabled youth 18 years of age or older, who have been placed in a CIL approved by the Department and IDHS.
CUS	College/University Scholarship. DCFS Scholarship only.
DEC	Deceased. Reports the death of a child when the Department has

	an open case and legal responsibility for the child.
DET	Detention Facility/Jail
DRA	Delegated Relative Authority. Not in use after 1/1/1997.
FHA	Foster Home Adoption
FHB	Foster Home Boarding - DCFS
FHI	Foster Home Indian. Licensed, Specified or approved by an Indian child's tribe.
FHP	Foster Home Boarding - Private Agency
FHS	Foster Home Specialized
GDN	Guardian Successor. This program is only offered if they are in a cost-neutrality area described in Rules 302, Section 302.405.
GRH	Group Home
HAP	Home Adoptive Parents. This code is used to report the final living arrangement after adoption is completed.
HHF	Hospital/Health Facility
HMP	Home of Parent. Used also for Adoption Assistance cases.
HMR	Home of Relative
HRA	Home of Relative Application
ICF	Institution - DCFS
IDC	Institution – Committed to the Department of Corrections
ILO	Independent Living Only
IMH	Institution – Department of Mental Health
IOP	Institution - Other Public
IPA	Institution - Private Child Care Facility
IRS	Institution Rehabilitation Services
JTP	Job Training Program. Child is participating in a recognized job-training program.
MIS	Other Missing Living Arrangement
NCF	Nursing Care Facility
OTH	Other
PND	Pending Living Arrangement
RNY	Runaway
SGH	Subsidized Guardian Home
TLP	Transitional Living Program. Placement approved by a regional Clinical Services Manager.
UAP	Unauthorized Placement. The child's whereabouts are known, but the child is living in an unauthorized/unapproved placement.
UNK	Other Unknown
WCC	Whereabouts Unknown. Child periodically initiates contact with his or her assigned caseworker.
WUK	Whereabouts Unknown. The child's whereabouts are unknown and the child is not known or believed abducted.
YES	Youth Emergency Shelters
YIC	Youth in College. Placement approved by the Deputy Director of the Division of Educational and Transition Services. This code

	may only be entered by the Central Office Payment Unit.
YIE	Youth in Employment. Placement approved by the Deputy Director of the Division of Educational and Transition Services. This code may only be entered by the Central Office Payment Unit.

Appendix A

Descriptions of the Original Data

The Chapin Hall DCFS database represents a refinement of the original DCFS data. This section describes the original data extracts and provides additional information on data retention and reliability. It is essential that any researcher working with the CANTS-CYCIS data be aware of these issues.

CANTS Address File

Description: The CANTS system tracks the status of abuse and neglect investigations over time in Illinois. The CANTS Address File provides address information for the individuals associated with investigations. These addresses allow Chapin Hall to create alternative geographic units for analyses and to link individuals across data systems. DCFS creates the Address File separately from the CANTS Case/Subject Pulldown File at the end of each month.

Limitations: It is likely that the addresses in the Address File only correspond to indicated investigations of abuse/neglect. Although Chapin Hall has never confirmed this assumption, it suspects that address data is complete for individuals associated with indicated investigations.

Chapin Hall has not yet verified whether the information in this file is ever purged.

CANTS Case Subject Pull

Description: The Child Abuse and Neglect Tracking System tracks the status of abuse and neglect investigations over time in Illinois. Chapin Hall receives an extract of the system called the Case Pulldown File (also called the Case “Subject” File) on a monthly basis. The data in the extract are generally historical to 1981. However, the Department purges identifying information from unfounded records after 1-2 months and from most indicated records after 5 years.

The pulldown file contains three record types: investigation, child, and caretaker. All three record types contain investigation information describing the key administrative events that occur in response to a report of abuse or neglect (e.g., dates of investigation initiation, protective custody, and finding). Investigation records, however, provide the most detail about these events (e.g., number of contacts with the family, hospitalization actors, special instructions). Child records provide information specific to the child such as: demographics, allegation(s), allegation finding(s), and the identity of the perpetrator(s). Caretaker records provide similar information and identify the caretaker’s demographics, involvement in the abuse/neglect, the

children involved, allegation(s), and their finding(s). Caretaker records specify the relationship between the caretaker and child/children.

The pulldown file does not contain addresses. CANTS addresses are sent to Chapin Hall in a separate file called the "CANTS Address File."

Limitations: Because the system purges names from records, it is possible for an individual to be identified by more than one ID. As a result, the data over-count the number of children and alleged perpetrators involved with the CANTS system.

The data do not specify the relationships among children in a household, and therefore sibling relations must be extrapolated. Chapin Hall has used the caretaker ID as an alternate means of grouping siblings.

At 3 months post-report some investigations still remain open and their finding is pending.

According to Department policy, all identifying information (i.e., names) must be purged (removed) from unfounded records between 30 and 60 days of the investigation finding, depending on the type of reporter (e.g., mandated versus nonmandated). In the case of priority I or II reports made by mandated reporters and reported allegations of death by a nonmandated reporters, however, identifying information is retained for one year.

The Department may keep records of unfounded reports at the request of the subjects of the report to prevent future harassment of the subject.

Identifying information for children and caretakers in most indicated investigations is retained for five years. If a subsequent report involving any of the same caretakers, children or their siblings is indicated, the identifying information will be retained for a longer period. Any indicated report involving serious physical injury, sexual molestation or sexual exploitation of a child is retained for 20 years, while an indicated report involving the death or sexual penetration of a child is retained for 50 years.

CYCIS Board Payment Pull

Description: The Board Pull is a yearly historical extract of the DCFS Board data in the Management and Reporting System. The Pull contains records of payments to foster parents, group homes, institutions, and supervising agencies for individual children. Chapin Hall's Board records are complete for state fiscal years 1992-2000.

The Board data identify the provider by name, address and Social Security Number. They provide a payment history which includes the total payment amount, living arrangement type, and provider. The total payment amount represents the total amount DCFS paid for the care of a child in one month. This includes the payment to the foster parent or group home as well as any payment made to a supervising agency for the management of the case.

Names, address information, and IDs (including the provider SSN/FEIN) appear to be quite reliable in the data on the accounts payable records. This information is often missing on accounts receivable records. Chapin Hall has worked most extensively with payment records.

Since 1997, the Board data have been coming to Chapin Hall in yearly (fiscal year) increments rather than in quarterly pulls with lapse files.

Limitations: One must calculate the payment to the foster parent from the child's age and type of placement since the total payment amount also includes administrative costs.

Short stays in care are not always recorded.

On rare occasions the board data will reflect payment for days when the child is not actually in care. This is especially true in the last month of a placement.

Service begin and end dates are missing when the payment is associated with more than one spell within a month.

Incorrect payment records are overwritten with corrected payments. Other fields are never overwritten.

CYCIS Case Journal Pull

Description: The Case Journal Pull records the history of case managers assigned to child and family cases. This history preserves case manager assignments for all cases open on or after July 1, 1976.

The assignment and reassignment dates describe the period in which a given case manager was responsible for the case. Periods of time between multiple child or family case openings can be identified in the data.

The case type variable differentiates child from family records.

Limitations:

CYCIS Case Manager Pull

Description: The Case Manager Pull is an historical extract of the DCFS Case Manager Database which registers case managers in the CYCIS system. Extract records date from June 29, 1982.

The Case Manager Pull provides characteristics of DCFS and provider-agency case managers such as race, education, and language spoken, and characteristics of their employment such as position and position start date.

This pull is useful for identifying the agency serving a child. It identifies the current case manager's Team which can be linked to the Team data file in order to identify the agency supervising the case manager.

Limitations: The segment entry and change dates appear to be meaningless, since they can remain unchanged when other information on the record is updated.

This pull file contains missing information for some case managers in the race, education, and language code fields. The problem appears to be limited to older records in the file.

CYCIS Case Manager Team File

Description: The Case Manager Team File provides information on the agency that supervises each case manager team.

The supervising agency ID (spvsid) can be joined with the provider ID in the provider address table in order to identify the agency name. This is an historical file which contains data from 1976 through the present.

Limitations:

CYCIS Child Pull

Description: The Child Pull, a monthly extract of the CYCIS system, records information on child welfare cases open on or after July 1, 1976. It contains a main record and living arrangement, legal history, and trust trailers.

Every child case opening a child experiences will have a main record. This record provides current case information including the child's living arrangement, legal status, and demographic characteristics.

The living arrangement trailer records every change in placement a child experiences during a case, with the exception of the current placement which is found on the main record. The trailer provides an historical view of the child's living arrangements and details each by date, type, reason placed, and the identity of the provider. Each record on the living arrangement trailer records information on four placements in reverse chronological order.

The legal trailer reflects all changes in legal status a child experiences during a case, with the exception of the current status which is always stored on the main record. The legal trailer provides the child's legal status, date, docket number and guardian. Each trailer record contains data for three status changes in reverse chronological order.

If a child has money being held in trust, a single trust trailer is written containing up to the last seven changes in trust status. The trust trailer provides trust type, trust status and trust status effective date.

The child pull relates children to cases, placements, and changes in legal or trust status.

Limitations: The handicap code is considered reliable after 1993.

The supervising agency ID, which appears on the living arrangement trailer, is not historical. Each living arrangement record contains the ID of the most recent supervising agency rather than that of the the agency that supervised the provider at the time the record was created.

Address information is often overwritten so that only the current address is preserved.

CYCIS Client Registration Pull

Description: The Client Registration Pull, a monthly extract of the DCFS Client Registration Database, records the IDs, first names, demographics, and addresses of every individual in the CYCIS system. Data are available for cases open on or after July 1, 1976.

The Client Registration Database records demographic characteristics and addresses of all household members when a family or child case is opened. This Pull includes children not in placement and secondary adults living in the home.

Limitations: The system overwrites demographic and address information each time a case is opened and over time as changes are registered with the Department.

CYCIS CM 46-47 File

Description: The CYCIS CM 46-67 file records data on finalized adoptions. CM 46-47 refers to the screen number in the CYCIS system where the data is maintained. The file contains AFCARS data that DCFS is required to report to the Department of Health and Human Services, Administration for Children and Families twice yearly. The data contain information on adoptions from approximately 1997 through December of 2000.

The file contains one observation per CYCIS Child ID (caseid and caseno). The Child ID links children in the CM 46-67 file to the rest of their CYCIS records.

Limitations: These data should contain one record for every child who is adopted while in DCFS custody, however, as of December 2000 the system has not been fully implemented and the data are incomplete. No data exists for children adopted prior to Fiscal Year 1998.

There is pressure from the Federal government on child welfare agencies to record all of their adoptions in this dataset, and missing information results in lost revenue. Therefore, Chapin Hall expects that the quality of these data will be high once the system is fully functional.

Chapin Hall is aware that DCFS modifies information on existing records between pulls but believes these to be corrections. The extent to which records are modified is unknown.

CYCIS Family Pull

Description: The Family Pull, an extract of the DCFS CYCIS database, records historical information on family cases. A Family Case must be opened before a family can receive services such as counseling/advocacy, homemaker, day care, or parent education. Chapin Hall receives the Family Pull data on a monthly basis. The data are fully historical for cases open on or after July 1, 1976.

The Family Pull provides information on several aspects of the case. It records the opening and closing dates and reasons; identifies the case manager by name and site; and registers the case review reason, date, and permanency plan. Although the Pull offers demographic and identifying information on the head of household (name, SSN, citizenship status), it does not specify this individual's relationship to the children in the home.

Limitations: The data do not specify the relationship between the head of household and the children living in the household.

The system overwrites addresses; only the current address is preserved. Closed cases reflect the address at last opening.

CYCIS Goal Evaluation Pull

Description: The CYCIS Goal Evaluation Pull contains the history of the goal established and goal evaluation dates for every child with an open child case.

CYCIS Permanency Goal Pull

Description: The CYCIS Permanency Goal Pull records the history of permanency goals assigned to individual children with open child cases. The data contains a goal established date and goal evaluation date for each permanency goal assigned.

MARS Voucher Pull

Description: The Voucher Pull, a yearly historical extract of the Voucher Database in the Management and Reporting System, tracks payments for services such as intact family care (Cook County), after-care, family preservation, counseling, and other administrative costs. It is the only source of data on non-placement services used by wards and their families. The data cover state fiscal years 1992-2000.

The Voucher Pull contains two record types: summary (type A) and detail (type B). Summary records identify the provider and total payment amount and provides taxation information. Detail records identify the provider and the client, dates of service, and itemized payments for services.

In its work with the data, Chapin Hall has observed a number of undocumented characteristics of Summary and Detail records.

Summary Records:

- In most cases, the obligation amount (*oblamt*) is the same as the first object code amount (*obj2amt*).
- The variable *voucid* is usually the unique key for these records. In the few instances where the *voucid* is not unique (within a fiscal year) the records contain different voucher status dates (*vsdate*). Since we assume that these records reflect the same payment, we feel it is justifiable to select only one record per *voucid* for analysis.
- It is most likely that the *obj2amt-obj2amt5* variables reflect the total dollar amount of the voucher, though Chapin Hall is uncertain of how these compare to the expense variable (*expend*).
- In 98% of the A records the *obj2amt* is equal to the sum of the *tot_pd_a* across all voucher B records when A and B

records are joined by *voucid* and *vsdate*.

Detail Records:

- The B records contain the 8-byte client id (*vcliid*)
- *vcliid* is missing on 16-30% of the voucher B records. When it contains a value, we assume that the B record is providing information about the service a particular client received.
- Most *typeserv* codes found on the B records differ from those we normally see in the *cyc_livar* table
- *tot_pd_a* reflects the total paid amount for each voucher B record. The more detailed amount variables should sum to the value of *tot_pd_a*.
- B records contain other variables that might be of use in categorizing services, however, their value lists have not yet been defined (i.e., *appracct*, *appracct2*, *obj2code*, and *oblcode*).

Limitations: There are limitations on the extent to which all families receiving family preservation services are included in the data. Some of these are still unknown.

Provider Licensing and Registration Pull

Description: The Provider Licensing and Registration Pull, a monthly extract of the Provider Registration and Tracking and Licensing Systems, contains historical records on all service providers since 1980. The pull identifies the provider (name and address), the facility (name), and the provider's license type (status, date, and approval code).

Limitations: Licensing information is historical while provider information is not.

The system overwrites provider demographic and address information each time there is a change in the provider's information (e.g., address, licensing status).

Appendix B

Parameter Files

The original DCFS extract files are not stored in a format that facilitates analysis. Chapin Hall selects the variables that are pertinent to its research and restructures the data so that they can be stored in a relational database. The following parameter files are specifications for reading the original extracts. These files can be used to determine the variables that Chapin Hall receives but does not include in their database.
