Database Codebook

Author: Dan Phillips
Document last saved: 5/18/2010

OVERVIEW

Sample consists of 121 cases, divided evenly between "frequent moves" and "infrequent moves."

Data is entered into a Filemaker database, then exported as CSV tables. These CSV tables are converted into SAS sets.

Data Disbursement:

APSARA:/data2/stability/YYYYMMDD/ (w/ identifying data removed)
